# MINI PROJECT- ABSTRACT

## FAB MAGICS
## ONLINE-CLOTHING STORE

As more and more shoppers go online to purchase their clothes …there's never been a better time to launch on online boutique .

Boutique are successful because they're style educators .Many consumers don't have the time or know how to style themselves. fashion is fickle, and they're scared to try a new trend .Until boutique show them how they walk in the store to be inspired ,to feel good about themselves in their clothes.

The purpose of the proposed system is to develop a web program ,which provides a friendly interface for the user to explore the products and buy them according to their choice across the internet.

The website also provide Rent facility.Customers can take the product for rent ,for a period of time.

The Aim of the project is to provide a dynamic website for the clothing store.

## USERS:

1. **Customer**
   - ➢ **Registration/Login**
   - ➢ **Forgot/Change password**
   - ➢ **Edit profile**
   - ➢ **Add/View Wishlist**
   - ➢ **View Payment history/Shopping history**
